About Dealer Credit Corp.

Dealer Credit is a national finance company specializing in furniture, fixtures and equipment for the franchise automobile industry.

Leasing has never been this easy.

Requests for up to \$150K requires just a completed application and a bank reference. Higher amounts sometimes require a full financial package.

No Personal Guarantees

98% of our lease/finance agreements are approved without personal guarantees.

Competitive Rates and Terms

Low rates and terms up to 60 months.

Advantages of Leasing

Companies choose leasing because it eliminates large amounts of cash required for outright purchases and allows funds to be used for other purposes. It is the use of the system, not its ownership, that produces revenue.
